

Customer Information

Your Direct Line to EICHLER

24/7 service on spare parts and equipment excess stock in case of emergency

+49 8196 9000-247

Our telephone service is available 24 hours a day, 365 days a year, including Sundays and public holidays. We supply fully tested spare parts from stock. Please contact us for further details. In case of machine breakdown, you can contact our technical support team directly.

Questions about sales, maintenance and repair

+49 8196 9000-0

Due to the high quality standards we set ourselves, you will receive all repaired, replacement or exchange devices cleaned, refurbished and function-tested, with at least a 24-month guarantee and warranty. Ask at any time about maintenance orders on-site or for a detailed cost estimate. **If you have any basic questions, please arrange a personal consultation appointment with your EICHLER sales representative.**

Life Cycle Management

+49 8196 9000-350

When it comes to ensuring system availability, Configuration Management with an on-site inventory or the right supply strategy – then you've come to the right place. We will be happy to answer your questions or arrange an appointment for a detailed consultation.

Training schemes – EICHLERakademiE

+49 8196 9000-366

Do you have any questions about contents, hotel bookings, how to reach us? Are you in need of specific technical consultations or do you wish to join our training schemes? We will be happy to help you!

Sell excess stock

+49 8196 9000-550

We are constantly on the lookout for devices and units from the fields of HMI, PLC assemblies, drive technology and robotics. Across all manufacturers, we offer you an uncomplicated and fast way to reduce your automation technology stocks.

Purchase and Dismantling

Surplus Stock

Options of reduction

Sell your surplus electronic stock to **EICHLER** or commission us to dismantle your entire system.

When machines or systems are retrofitted or taken out of service entirely, the installed automation technology is often disposed of along with them – a big mistake! Selling no longer needed assemblies, HMI panels, drive technology, or robotics electronics can earn you a substantial return.

Hidden Gold in Your Warehouse

Reducing inventory levels offers several financial benefits: in addition to the revenue from sales, storage costs decrease, and in some cases, warehouse space can even be reduced.

Production Relocation or Spare Parts Warehouse Clearance

Relocating production not only requires time-consuming dismantling but also the proper – and often costly – disposal of housings, components, and hazardous waste. To minimize these disposal costs, selling removed electronic devices is often considered; however, the seller is typically responsible for warranty obligations. When you commission EICHLER, we waive these obligations.

Dismantling by **EICHLER**

EICHLER's full-service offering is flexible and tailor-made, available in both Germany and Austria. On-site, we dismantle devices and mechanical components – and complete system dismantling is also possible. Depending on the scope, we occasionally cooperate with WISAG. Upon completion, we leave the facility swept clean.

Inventory Recording and Listing

The purchasing team at EICHLER is constantly on the lookout for new sources of supply. For an initial assessment, photos of the devices and/or nameplates are sufficient. A follow-up call from our team saves time, as it quickly clarifies which devices are of interest to EICHLER. Prior contact is especially recommended for Siemens SIMATIC® S5 devices or larger quantities.

Sell Instead of Dispose – These Are Your Benefits

- ✓ Earn money by selling devices you no longer need
- ✓ Reduce inventory and storage costs
- ✓ Save the time and expense of proper disposal
- ✓ Protect the environment through refurbishment and reuse
- ✓ No warranty obligations for the devices you offer
- ✓ Avoid the effort of dismantling individual devices

Purchase by **EICHLER**

LISTING

You provide a list of the items for sale, including manufacturer, part number, photos, and quantities

EVALUATION

Each electronic device is individually assessed based on current market data, availability, product status, and condition.

OFFER

You receive a binding offer. Once the order is confirmed, a pick-up date is scheduled. Upon request, we can dismantle the devices on-site.

PICK-UP

Pick-up is free of charge within Germany and Austria for items to 30 kg and is handled by UPS. You only need to ensure transport-safe, stable packaging.

PAYMENT

Payment is initiated immediately after the device is received by EICHLER. Alternatively, a value credit can be issued.

Dismantling by **EICHLER**

INSPECTION

Each electronic device is individually evaluated based on current market data, availability, product status, and condition.

OFFER

You receive a binding offer, and together with you, a detailed specifications document (scope of work) is created. Upon order confirmation, the dismantling schedule is arranged.

DISMANTLING

Our experts dismantle devices and mechanical components on-site; complete system dismantling is also possible. The facility is left swept clean upon completion. This full-service is available in Germany and Austria. Any dismantling costs can be offset against the value of the removed devices.

PAYMENT

After dismantling and a final review meeting, payment is initiated. Alternatively, a value credit can be offered.

Easily List Your Inventory Online

You can find the Excel template for listing your inventory at:

These Manufacturers/ Units Are Currently in Demand

EICHLER purchases automation technology across various manufacturers in the fields of HMI panels, PLC control systems, drive technology, and robotics. Devices that are discontinued or already phased out are especially sought after. It does not matter whether you want to sell individual items or large, mixed lots. For sufficient volume, EICHLER experts offer full-service support on-site – from inventory recording and qualification to dismantling and collection of your equipment.
